

## POOL FINISH AFTERCARE DIRECTIONS

**DO NOT ADD SALT, VACUUM or HEAT FOR 1st MONTH**

### First week **\*Do not swim\***

- ❖ Run pump 24 hours
- ❖ Keep pH 7.0
- ❖ Balance pool water hardness to 250 ppm
- ❖ Maintain 1 chlorine tab in system
- ❖ Brush daily, minimum 3 times a week
- ❖ Clean filter weekly

### Week 2 **\*Safe to swim\***

- Run pump 12 hours minimum
- Maintain 7.2 - 7.4 pH
- Bring Alkalinity to 60 ppm
- Maintain 1 chlorine tab in system
- Brush daily, minimum 3 times a week
- Clean filter only if needed (high pressure)

### Week 3 to 4 **\*Safe to swim\***

- ❖ Run pump normal schedule
- ❖ Balance water 100% to normal swimming levels
- ❖ Continue to brush weekly
- ❖ Safe to add liquid chlorine
- ❖ Clean filter only if needed (high pressure)

### Week 5 **\*Return to normal pool use\***

Pool vacuuming allowed, add salt and use of salt system allowed.

We recommend you bring in a sample of water for a full panel analysis test at your local pool store and balance water accordingly. Resume normal weekly pool service. Clean filter monthly.

We recommend using Orenda SC-1000 to prevent scaling.
